

BWT-009

Concentrated Source of Phosphate

- Used for precipitation of calcium in steam boilers
- Composed of condensed phosphate so precipitation will not occur in feedwater lines
- Convenient, ready-to-use liquid formula

General Description

BWT-009 is formulated for use in steam boilers and ideally suited for use in industrial service to precipitate calcium properly in the boiler. Due to the composition of **BWT-009** it will not form a precipitate in feedwater lines.

Spectrum[®] treatment products and programs are the key to long-term preventive maintenance. Make **Spectrum**[®] a part of your preventive maintenance program today.

Specifications

Wt/Gallon:	11.3 lbs
pH:	Neutral
Appearance:	Clear Liquid
Odor:	None

- Meets FDA Regulation CFR Title 21 Part 173.310, Part 176.180

Handling

Recommended storage limit is 18 months.
Keep container closed when not in use.

Application

The amount of **BWT-009** will vary depending on the analysis of the make up water. We recommend **BWT-009** be used with the appropriate oxygen scavengers, dispersants, and alkalinity adjustment treatments.
