

BWT-011

Steam Boiler Treatment

- One product does the work of three:
 - Control scale and corrosion.
 - Inhibit oxygen pitting.
 - Inhibit return line corrosion.
- Convenient, ready-to-use liquid.

General Description

BWT-011 is specifically formulated to prevent scale and corrosion in steam boiler systems. It combines alkalinity adjustments, phosphates, and patented sludge conditioners, condensate line treatment and oxygen scavengers to handle a variety of supply waters.

Spectrum® treatment products and programs are the key to long term preventive maintenance. Make **Spectrum®** a part of your preventive maintenance program today.

Specifications

Wt/Gallon:	9.89
pH:	Greater than 11.5
Specific gravity:	1.175
Appearance:	Clear Liquid
Odor:	Slight Amine

Handling

Recommended storage limit is 18 months.
Keep container closed when not in use.

Applications

BWT-011 can be added on a periodic basis through a bypass feeder on the makeup or feedwater line. For high makeup boilers, an alkali resistant chemical feed pump is recommended.
