

# BWT-700

## *Steam Boiler Treatment*

- One product does the work of three:
  - Control scale and corrosion
  - Inhibit oxygen pitting
  - Passivates steel and iron against oxygen attack
- Excellent oxygen scavenger that minimizes dissolved solids
- Convenient, ready-to-use liquid

### General Description

**BWT-700** is specifically formulated to prevent scale and corrosion in steam boiler systems. It combines alkalinity adjustments, softening materials, antifoams and sludge conditioners, and oxygen scavenger to handle a variety of supply waters.

**Spectrum**<sup>®</sup> treatment products and programs are the key to long-term preventive maintenance. Make **Spectrum**<sup>®</sup> a part of your preventive maintenance program today.

### Specifications

Wt/Gallon:	8.92 lbs
pH:	Greater than 11.5
Specific Gravity:	1.070
Appearance:	Amber color
Odor:	Organic

- Meets FDA Regulation CFR Title 21 Part 173.310
- Qualifies as GRAS CFR Title 21 Part 182.3041, subpart D

### Handling

Recommended storage limit is 18 months.  
Keep container closed when not in use.

### Applications

The amount of **BWT-700** will vary depending on the analysis of the make-up water. It may be necessary to supplement with MP-131 to provide proper dissolved oxygen control. **BWT-700** can be added on a periodic basis through a bypass feeder on the makeup or feedwater line. For high makeup boilers, an alkali resistant chemical feed pump is recommended.
