

CWT-125

Recirculating Cooling Water Treatment

- Contains patented polymer technology.
- Multiple corrosion inhibitors for all metal surfaces.
- Contains molybdate for protection in low alkaline water.
- One, easy-to-use formula for scale and corrosion control.

General Description

CWT-125 is a superior formulation designed to control scale and corrosion problems in recirculating cooling systems. **CWT-125** contains a blend of corrosion inhibitors to protect all system metals. These inhibitors are free of chromates and phosphates. Phosphonates and a new patented terpolymer are used for exceptional hardness and hydrated iron oxide scale control.

Spectrum® treatment products and programs are the key to long term preventive maintenance. Make **Spectrum®** a part of your preventive maintenance program today.

Specifications

Wt/gallon:	8.60
pH:	2.0 – 4.0
Specific gravity:	1.035
Appearance:	Clear Liquid

Handling

Recommended storage limit is 18 months.
Keep container closed when not in use.

Application

CWT-125 may be fed undiluted or mixed with water to any convenient concentration.
