

# VOLTREET® 95

## Condensate Line Treatment

- Prevents carbonic acid corrosion of the condensate system
- Can be used in humidification when added with a chemical pump
- Can be used with sodium nitrite based inhibitors
- Provides distribution throughout your boiler system
- Cleaning action will gradually remove old corrosion deposits
- Convenient ready-to-use liquid formula

### General Description

**Voltreet 95** is formulated to prevent corrosion of condensate return lines.

**Spectrum®** treatment products and programs are the key to long-term preventive maintenance. Make **Spectrum®** a part of your preventive maintenance program today.

### Specifications

|                   |              |
|-------------------|--------------|
| Wt/Gallon:        | 8.32 lbs     |
| pH:               | > 11.0       |
| Specific Gravity: | 0.99         |
| Appearance:       | Clear Liquid |
| Odor:             | Faint Amine  |

- Do not use in USDA or FDA plants.

### Handling

Recommended storage limit is 18 months.  
Keep container closed when not in use.

### Applications

The dosage of **Voltreet 95** will vary depending upon the formulation of the condensate system, the makeup water analysis and the amount of makeup water. **Voltreet 95** is controlled by maintaining the pH of the condensate in a slightly alkaline range.

**Voltreet 95** is added to the system continuously when humidifying or on a periodic basis depending upon the system needs. It can be added to the boiler through a bypass feeder or a chemical feed pump.
