

VOLTREET[®] FP-40

Condensate Line Treatment

- Prevents carbonic acid corrosion of the condensate return
- USDA approved for meat and poultry plants
- Convenient ready-to-use concentrated liquid formula
- Cleaning action will gradually remove old corrosion deposits

General Description

Voltreet FP-40 is a single neutralizing amine for neutralization of carbonic acid.

Voltreet FP-40 is acceptable, under FDA Regulations, for use in boilers producing steam that contacts food. It is also USDA authorized for use in meat and poultry plants.

Spectrum[®] treatment products and programs are the key to long term preventive maintenance. Make Spectrum[®] a part of your preventive maintenance program today.

Specifications

Wt/Gallon:	8.17
pH:	11.1
Appearance:	Clear liquid
Odor:	Amine

- USDA Authorized – G 6
- Meets FDA Regulation CFR Title 21 Part 173.310

Handling

Recommended storage limit is 18 months.

Keep container closed when not in use.

Applications

The dosage of Voltreet FP-40 will vary depending upon the design of the condensate system, the make-up water analysis and the amount of make-up water. Voltreet FP-40 is controlled, when contacting food, by maintaining the active amine content below 15 ppm.

Voltreet FP-40 is added to the system continuously or on a periodic basis depending upon the system needs. It can be added to the boiler through a bypass feeder or a chemical feed pump.
