

ALKALINITY ADJUNCT

Steam Boiler Treatment

- Prevents scale and corrosion to provide optimum boiler efficiency
- Ready-to-use liquid

General Description

Alkalinity Adjunct provides supplemental alkalinity control in steam boiler systems. The product is used with other boiler treatment formulations.

Spectrum[®] treatment products and programs are the key to long-term preventive maintenance. Make **Spectrum[®]** a part of your preventive maintenance program today.

Specifications

- | | |
|-------------------|-----------------|
| Wt/Gallon: | 12.8 lbs |
| pH: | Greater than 12 |
| Specific Gravity: | 1.53 |
| Appearance: | Clear |
- USDA Authorized – G 6
 - Meets FDA Regulation CFR Title 21 Part 173.310

Handling

Recommended storage limit is 18 months.
Keep container closed when not in use.

Applications

The dosage of **Alkalinity Adjunct** will depend on the makeup water analysis and the amount of make-up water used in the system. Dosage is controlled through periodic analysis of the boiler water.

Alkalinity Adjunct can be added on a periodic basis through a bypass feeder on the makeup water or feedwater line. For high makeup boilers, an alkali resistant chemical feed pump is recommended.
