

BD-0177

Iron Oxide and Sludge Dispersant

- Highly effective proprietary polymers that controls iron oxide and phosphates
- Prevents boiler deposits that can produce corrosion problems and reduce heat transfer
- Approved by USDA and meets FDA requirements for use in boiler where the steam produced contacts food or milk products

General Description

Effective sludge control coupled with superior iron oxide suspension gives you the one-two punch needed for superior internal boiler water performance.

BD-0177 is one part of the **Spectrum**[®] water treatment system formulated to produce state-of-the-art results with state-of-the-art products. **Spectrum**[®] treatment products and programs are the key to long-term preventive maintenance. Make **Spectrum**[®] a part of your preventive maintenance program today.

Specifications

Wt/Gallon:	9.1 lbs
pH (conc.):	10.8
Specific Gravity:	1.09
Appearance:	Clear Liquid
Max. Operating Pressure:	350 psi

- USDA Approved – G 6
- Meets FDA Regulations CFR Title 21 Part 173.310

Handling

Recommended storage limit is 18 months.
Keep container closed when not in use.

Applications

BD-0177 can be fed undiluted from the drum or in a diluted form with other **Spectrum**[®] products. An alkali resistant feed system is required.
