

RUSTOSCALE[®] CUSTOM 44

Recirculating Cooling Water Corrosion Inhibitor

- Allows higher cooling water concentrations, thereby reducing bleed-off and treatment costs
- Multiple corrosion inhibitors for all metal surfaces

General Description

Rustoscale Custom 44 is a highly effective, phosphonate formulation for prevention of corrosion in recirculating cooling water systems. **Scale is controlled with the separate feed of sulfuric acid.** Economy is achieved by increasing concentrations and maintaining clean heat transfer surfaces in hard water conditions.

Spectrum[®] treatment products and programs are the key to long-term preventive maintenance. Make Spectrum[®] a part of your preventive maintenance program today.

Specifications

Wt/Gallon:	9.34 lbs
pH:	2.5
Specific Gravity:	1.12
Appearance:	Clear, Light Yellow Liquid

- USDA Authorized - G 7

Handling

Recommended storage limit is 18 months.
Keep container closed when not in use.

Applications

Rustoscale Custom 44 may be fed straight or mixed with water to any convenient concentration. An acid resistant feeding system is required.
