

VOLTREET® FP-20

Condensate Line Treatment

- USDA approved for meat and poultry plants
- Convenient ready-to-use liquid formula
- Cleaning action will gradually remove corrosion deposits

General Description

Voltreet FP-20 is a formula for neutralization of carbonic acid and inhibition of corrosion in steam and condensate lines. **Voltreet FP-20** also removes old deposits from past corrosion of the system. **Voltreet FP-20** is acceptable, under FDA Regulations, for use in boilers producing steam that contacts food. It is also USDA authorized for use in meat and poultry plants.

Spectrum® treatment products and programs are the key to long-term preventive maintenance. Make **Spectrum®** a part of your preventive maintenance program today.

Specifications

Wt/Gallon :	8.33 lbs.
pH:	Greater than 10.5
Appearance:	Clear Liquid
Odor:	Faint Amine

- USDA Authorized - G 6
- Meets FDA Regulation CFR Title 21 Part 173.310

Handling

Recommended storage limit is 18 months.
Keep container closed when not in use.

Applications

The amount of **Voltreet FP-20** used will vary depending upon the design of the condensate system, the make-up water analysis and the amount of make-up water. **Voltreet FP-20** is controlled, when contacting food, by maintaining the active amine content below 15 ppm.

Voltreet FP-20 is added to the system continuously or on a periodic basis depending upon the system needs. It can be added to the boiler through a bypass feeder or a chemical feed pump.
